

## **Software development (m/f/d)**

location Wolfsburg, limited to 6 months

We are looking for a software developer for a new and exciting project.

### **Responsibilities**

- design and development of a database application
- development of mobile applications for iOS systems from conception to implementation
- participation in all phases of the project, you can use and expand your knowledge in design, implementation, testing and integration
- coordination of tasks and activities within the project team
- analyzing and documenting error situations that have occurred

### **Qualifications**

- university degree in computer science, physics, mathematics or a related field or an equivalent education
- you have mastered a scripting or programming language
- very good skills in object-oriented programming (e.g. C#)
- experience in the development of databases
- experience in requirements analysis of software development projects
- high self-motivation and good analytical and communication skills
- enjoyment of technically complex contexts and new technologies
- very good knowledge of German and/or English
- passion for development

### **What we offer you**

- a limited term position (with the possibility of a permanent position after 6 months) or an internship
- an innovative and exciting project
- opportunities for creativity and autonomy in the project work
- teamwork in a motivated project team
- we hear your opinion and take it seriously
- flexible working hours
- the possibility to work from home
